PROFESSIONAL EXPERIENCE

EXECUTIVE OPTICAL

Pio Del Pilar, Makati

Application Support

Jan 2026 - Present

- Provide application and technical support to EO branches and Head Office users through phone, remote-access tools, and on-site assistance, resolving system issues and user-related concerns.
- Perform system testing and quality assurance for newly developed or updated applications by identifying bugs, reproducing issues, and reporting findings to the development team.
- Assist with business and database analysis to support system documentation and technical analysis.

Assigned Project

- **System Analysis & Database Documentation**

Draw.io (diagrams.net) • DFD • ERD • MySQL

- Analyzed existing system workflows, processes, and MySQL database structures to understand system operations and data movement.
- Created Data Flow Diagrams (DFDs) to document interactions between users, system processes, external systems, and data stores.
- Developed Entity Relationship Diagrams (ERDs) to document database tables, primary and foreign keys, and relationships for technical reference.

Personal Project

- **EO Ticketing System**

Laravel • Next.js • TypeScript • MySQL

- Independently designed and developed a centralized web-based ticketing system to consolidate fragmented ticketing and spreadsheet-based support tracking.
- Developed end-to-end ticket management with branch assignment, concern categorization, priority and status tracking, attachments, and resolution monitoring.
- Implemented role-based access control for administrators and support staff, along with user activity tracking and authentication.
- Developed reporting and monitoring features to help Application Support personnel track branch concerns, ticket progress, and resolution history.
- Presented the completed system to Application Support Team Leads as a proposed solution for improving the existing support workflow.

CLASSIC SAVORY

Sto. Domingo Ave., Quezon City

Systems Programmer

Jun 2025 – Jan 2026

Laravel • Next.js • TypeScript • MySQL • VB.NET • Crystal Reports

- Migrated and modernized legacy VB.NET and Crystal Reports applications into a unified Laravel and Next.js web-based enterprise system.
- Developed integrated HR, Biometric, Payroll, and Accounting modules to consolidate previously separate business applications and workflows.
- Implemented automated cron jobs and scheduled processes for retrieving and updating employee biometric data.

- Implemented role-based access control (RBAC) and user permissions to secure system modules and functionality.
- Performed data migration and database integration from legacy systems into the consolidated platform.
- Deployed and configured the web application on a local server for internal company use.

EDUCATION

UNIVERSITY OF CALOOCAN CITY

Bachelor of Science in Information Systems, Cum Laude

Caloocan City

2021 - 2025

TECHNICAL SKILLS

- Languages: PHP, TypeScript, JavaScript, SQL, VB.NET
- Frameworks & Libraries: Laravel, React.js, Next.js, React Native, Tailwind CSS
- Databases: MySQL
- Tools: Git, GitHub, Postman, Draw.io (diagrams.net), Crystal Reports
- Development & Concepts: REST APIs, API Integration, Database Design, RBAC, DFD, ERD, System Testing, SDLC
